Italy · remote (EU timezone)

PROFILE

Application security, early career. I review code against the OWASP Top 10, model trust boundaries, and write reproducible checks plus regression tests. I also build the software, so remediation is practical. One public training lab; no paid pentests claimed. Currently studying Computer Science at UniMol; open to junior AppSec roles.

EXPERIENCE

Author · training lab
OCT 2026

BOLA/IDOR in an invoicing API

Local, synthetic data · errusso.github.io/security/lab-idor

- Built a local invoicing API with authentication but no object-level authorization; reproduced Alice reading Bob's invoice.
- Documented impact, root cause and fix; the regression test asserts vulnerable 200, fixed 404, owner/self 200 and anonymous 401.

Lab Source

Software development support
JUN–AUG 2024

Packly Prinigraf SRL

Campochiaro (CB), Italy · internal project, code not public

- Worked on an internal real-time dashboard with JWT/cookie auth, REST endpoints, SQLite persistence and a Slack integration.
- Hands-on with authentication boundaries and object-level data access in a production-facing internal tool; code private.

Open-source contributor
OCT 2026

napi-bindings/marmotta

Open source

- Reviewed an unfamiliar Node-API build tool, focusing on toolchain paths and failure handling.
- Covered custom-directory and failure paths with regression tests; +1115 / −44 across 15 files; documented upstream.

Marmotta

Creator & maintainer
OCT 2026

PipeDuck

MIT · v1.1.0

- TOML config validation, threshold clamping and hot reload; unit tests cover parsing and routing invariants.
- Threat-modeled audio-routing failure paths; tray/D-Bus surface remains open and is documented.

Repository Release

SKILLS

WEB SECURITY
OWASP Top 10 · BOLA/IDOR · authn vs authz · input handling

REVIEW
Secure code review · threat modeling · remediation notes

PROOF
Reproduction steps · regression tests · scoped disclosure

PLATFORMS
Node.js/Fastify · TypeScript/Next.js · SQL/SQLite · GitHub Actions

SYSTEMS
C++20 · Zig · Linux · PipeWire/libpulse

EDUCATION

2025–PRESENT
BSc Computer Science
Università degli Studi del Molise (UniMol)
Currently enrolled.

2019/20–2024/25
Technical diploma, Computer Science
Istituto Tecnico G. Marconi, Campobasso
Five-year technical track.
